WEALTH MINERALS LTD.

(An Exploration Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in Canadian Dollars)

(Unaudited – Prepared by Management)

Periods Ended February 29, 2008 and February 28, 2007

1. NATURE AND CONTINUANCE OF OPERATIONS

The Company's principal business activity is the exploration for and development of mineral properties, primarily in Argentina, Peru and Canada. The Company considers itself to be an exploration stage company.

The business of exploring for mining and minerals involves a high degree of risk and there can be no assurance that any of the Company's current or future exploration programs will result in profitable mining operations. The recoverability of amounts shown for minerals properties is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain financing to complete their exploration, development, and future profitable operations, or sale of the mineral properties.

These consolidated financial statements were prepared on a "going-concern" basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at February 29, 2008, the Company had working capital of \$3,475,706 (November 30, 2007 -\$5,312,194). The Company does not currently hold any revenue-generating properties and thereby continues to incur losses. The Company has an accumulated deficit of \$18,127,064 as at February 29, 2008 (November 30, 2007 - \$17,416,721).

The Company's ability to discharge its liabilities and fulfill its commitments as they come due is dependent upon its success in obtaining equity financing and, ultimately, on locating economically recoverable ore resources and attaining profitable operations. Failure to continue as a going-concern would require the restatement of assets and liabilities on a liquidation basis, which could differ materially from the going-concern basis.

These financial statements do not reflect adjustments that would be necessary if the going-concern assumptions were not appropriate because management believes that actions taken or planned will mitigate the adverse conditions that raise doubts about the Company's viability.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**Use of estimates**

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates. Accounts specifically requiring the use of management's best estimates and assumptions in determining carrying values are estimates of receivables, accounts payable and accrued liabilities, the carrying value of mineral properties, estimates of asset retirement obligations and reclamation costs, the allocation of fair value to the acquisition of Madero Minerals S.A.C., determining the variables used in the calculation of stock-based compensation and the effects of future income taxes. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows.

Principles of consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Triband Resource US Inc. (incorporated in Nevada, U.S.A.), which was disposed of in 2007, Wealth Minerals Peru, S.A.C. (incorporated in Peru) and Madero Minerals S.A.C. (incorporated in Argentina). All significant inter-company balances and transactions have been eliminated.

Periods Ended February 29, 2008 and February 28, 2007

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Cash and cash equivalents**

Cash and cash equivalents include cash in bank accounts and term deposits that are considered highly liquid investments readily convertible to known amounts of cash with negligible risk of changes in value because of changes in interest rates.

Mineral properties

The Company capitalizes all costs related to investment in mineral properties on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. Costs are deferred until such time as the extent of mineralization has been determined and mineral property interests are either developed, the property is sold or the Company's mineral rights are allowed to lapse.

All capitalized costs are reviewed on a property-by-property basis to consider whether there are any conditions that may indicate impairment. When the carrying value of a property exceeds its net recoverable amount (as estimated by quantifiable evidence of an economic geological resource or reserve or by reference to option or joint venture expenditure commitments) or when, in the Company's assessment, it will be unable to sell the property for an amount greater than the deferred costs, the property is written down for the impairment in value.

From time to time the Company may acquire or dispose of a mineral property interest pursuant to the terms of an option agreement. As such options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded at the time of the agreement. Option payments are recorded as property costs or recoveries when the payments are made or received. The amount shown for acquisition costs and deferred exploration expenditures represent costs incurred to date and do not necessarily reflect present or future values.

Capitalized costs will be depleted over the useful lives of the properties upon commencement of commercial production or written off if the properties are abandoned or the applicable mineral rights are allowed to lapse.

Asset retirement obligations

An asset retirement obligation is a legal obligation associated with the retirement of tangible long-lived assets the Company is required to settle. This would include obligations related to future removal of property and equipment, and site restoration costs. The Company recognizes the fair value of a liability for an asset retirement obligation in the year in which it is incurred and when a reasonable estimate of fair value can be made. The carrying amount of the related long-lived assets is increased by the same amount as the liability.

Environmental protection and reclamation costs

The operations of the Company have been, and may be in the future, be affected from time to time in varying degrees by changes in environmental regulations, including those for future removal and site restorations costs. Both the likelihood of new regulations and their overall effect upon the Company may vary from region to region and are not predictable.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in Canadian Dollars)

(Unaudited – Prepared by Management)

Periods Ended February 29, 2008 and February 28, 2007

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Company's policy is to meet or, if possible, surpass standards set by relevant legislation, by application of technically proven and economically feasible measures. Environmental expenditures that relate to ongoing environmental and reclamation programs will be recognized as a charge in the Statements of Operations as incurred or capitalized and amortized depending upon their future economic benefits. The Company does not currently anticipate any material capital expenditures for environmental control facilities because all property holdings are at early stages of exploration. Therefore, estimated future removal and site restoration costs are presently considered minimal.

Equipment

Equipment is recorded at cost and is being amortized over their estimated useful lives at the following rates:

Computer equipment	30% declining balance basis
Software	Two years straight line
Office furniture and equipment	20% declining balance basis

Additions during the year are amortized at one-half the annual rate.

Investment

Investments other than derivatives are classified as available-for-sale, and are carried at quoted market value, where applicable, or at an estimate of fair value. Resulting unrealized gains or losses, net of applicable income taxes, are reflected in other comprehensive income, while realized gains or losses are included in operations.

Foreign currency translation

The functional and reporting currency of the Company is the Canadian dollar. Amounts recorded in foreign currency are translated into Canadian dollars as follows:

- i. Monetary assets and liabilities, at the rate of exchange in effect as at the balance sheet date;
- ii. Non-monetary assets and liabilities, at the exchange rates prevailing at the time of the acquisition of the assets or assumption of the liabilities; and
- iii. Interest income and expenses (excluding amortization, which is translated at the same rate as the related asset), at the average quarterly rate of exchange.

Gains and losses arising from this translation of foreign currency are included in the determination of net loss for the year.

Loss per share

Basic earnings (loss) per share is calculated using the weighted average number of common shares outstanding during the year. Diluted earnings per share is calculated using the treasury stock method. Diluted loss per share amounts have not been presented as the effect of outstanding options and warrants is anti-dilutive.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in Canadian Dollars)

(Unaudited – Prepared by Management)

Periods Ended February 29, 2008 and February 28, 2007

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Stock-based compensation

The Company accounts for stock-based compensation expense using the fair value based method with respect to all stock-based payments to directors, employees and non-employees, including awards that are direct awards of stock and call for settlement in cash or other assets, or stock appreciation rights that call for settlement by the issuance of equity instruments. Under this method, stock-based payments are recorded as an expense over the vesting period or when the awards or rights are granted, with a corresponding increase to contributed surplus. When stock options are exercised, the corresponding fair value is transferred from contributed surplus to capital stock.

Income taxes

Future income taxes are recorded using the asset and liability method. Under this method, future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Future tax assets and liabilities are measured using enacted or substantially enacted tax rates expected to apply when the asset is realized or the liability settled.

The effect on future tax assets and liabilities of a change in tax rates is recognized in income in the period that enactment or substantive enactment occurs. To the extent that the Company does not consider it to be more likely than not that a future tax asset will be recovered, it provides a valuation allowance against the excess.

Flow-through common shares

Under the terms of Canadian flow-through share legislation, the tax attributes of qualifying mineral exploration expenditures are renounced to the flow-through share subscribers. To recognize the foregone tax impact, capital stock is reduced and future income tax liability is recognized at the time the related expenditures are renounced. Losses for income tax purposes are reduced by the amount of the flow-through renunciation.

Revenue recognition

Interest income is recorded as earned at the stated rate of interest of the term deposits over the term to maturity.

Future accounting changes

i) Capital Disclosures

In February 2007, the Canadian Institute of Chartered Accountants' ("CICA") issued Handbook Section 1535, "Capital Disclosures", which requires the disclosure of both qualitative and quantitative information that provides users of financial statements with information to evaluate the entity's objectives, policies and procedures for managing capital. The new section is effective for years beginning on or after October 1, 2007. The Company is in the process of assessing the impact of this new section on its consolidated financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

ii) Financial Instruments

In February 2007, the CICA issued two new standards, Section 3862, “Financial Instruments Disclosures”, and Section 3863, “Financial Instruments Presentation”. These sections will replace the existing Section 3861 “Financial Instruments Disclosure and Presentation”. Section 3862 provides users with information to evaluate the significance of the financial instruments of the entity’s financial position and performances, nature and extent of risks arising from financial instruments, and how the entity manages those risks. Within Section 3863 the classification of financial instruments, related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities are offset. The new sections are effective for years beginning on or after October 1, 2007. The Company is in the process of assessing the impact of these new sections on its consolidated financial statements.

iii) Goodwill and Intangible Assets

In February 2008, the CICA issued Handbook Section 3064 “Goodwill and Intangible Assets”, replacing Section 3062, “Goodwill and Other Intangible Assets”, and Section 3450, “Research and Development Costs”. These sections establish standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets by profit-oriented enterprises. Standards concerning goodwill are unchanged from the standards included in the previous Section 3062. The new sections are effective for years beginning on or after October 1, 2008. The Company is in the process of assessing the impact of these new sections on its consolidated financial statements.

iv) International Financial Reporting Standards (“IFRS”)

In 2006, the Canadian Accounting Standards Board (“AcSB”) published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian generally accepted accounting principles (“GAAP”) with IFRS over an expected five year transitional period. In February 2008 the AcSB announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada’s own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the years ended December 31, 2010 and earlier where applicable. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

3. FINANCIAL INSTRUMENTS

(a) Changes in accounting policies

Effective December 1, 2006, the Company adopted the following new accounting standards issued by the CICA relating to financial instruments. These new standards have been adopted on a prospective basis with no restatement to prior period financial statements.

i) **Financial Instruments – Recognition and Measurement (Section 3855)**

This standard sets out criteria for the recognition and measurement of financial instruments for fiscal years beginning on or after October 1, 2006. This standard requires all financial instruments within its scope, including derivatives, to be included on a Company's balance sheet and measured either at fair value or, in certain circumstances when fair value may not be considered most relevant, at cost or amortized cost. Changes in fair value are to be recognized in the statements of operations and comprehensive income.

All financial assets and liabilities are recognized when the entity becomes a party to the contract creating the item. As such, any of the Company's outstanding financial assets and liabilities at the effective date of adoption are recognized and measured in accordance with the new requirements as if these requirements had always been in effect. Any changes to the fair values of assets and liabilities prior to October 1, 2006 are recognized by adjusting opening deficit or opening accumulated other comprehensive income.

All financial instruments are classified into one of the following five categories: held-for-trading, held-to-maturity, loans and receivables, available-for-sale financial assets or other financial liabilities. Initial and subsequent measurement and recognition of changes in the value of financial instruments depends on their initial classification.

ii) **Comprehensive Income (Section 1530)**

Effective December 1, 2006, the Company adopted the CICA Handbook Section 1530, "Comprehensive Income", which establishes standards for presentation and disclosure of comprehensive income. Comprehensive income is the overall change in the net assets of the Company for the period, other than changes attributed to transactions with shareholders. It is made up of net income and other comprehensive income. The historical make up of net income has not changed. Other comprehensive income includes gains or losses, which GAAP requires to be recognized in a period, but excluded from net income for that period.

(b) Fair value

The carrying values of cash and cash equivalents, accounts receivable, refundable acquisition fee, accounts payable and accrued liabilities, and due to related parties approximate their fair values because of the short-term maturity of these financial instruments.

(c) Interest rate risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

3. FINANCIAL INSTRUMENTS (Continued)**(d) Credit risk**

The Company is exposed to credit risk with respect to its accounts receivable, which consists largely of tax credits receivable from Mexican, Argentinean, Peruvian and Canadian agencies, interest receivable, and rent receivable. Cash and cash equivalents have been placed with major financial institutions.

(e) Currency risk

The Company is exposed to foreign currency fluctuations to the extent expenditures incurred are not denominated in Canadian dollars. The Company has not entered into any foreign currency contracts to mitigate this risk.

4. ACQUISITION OF MADERO MINERALS S.A.C.

On September 12, 2007 (the “Acquisition Date”) the Company exercised its option to acquire 100% of the issued and outstanding shares of Madero Minerals S.A.C. (“Madero”) (note 8). The Madero acquisition is accounted for using the purchase method, with the Company identified as the accounting acquirer. The accompanying consolidated financial statements include the results of operations of Madero from the Acquisition Date. The purchase consideration of \$1,017,000 is comprised of the fair value of 300,000 common shares of the Company, which has been allocated to the underlying assets acquired and liabilities as follows:

	Amount
Net assets acquired:	
Accounts receivable	\$ 1,079,035
Less accounts payable and accrued liabilities assumed	<u>(166,082)</u>
	912,953
Mineral properties	4,869,489
Less amounts capitalized as mineral property costs in prior years	(529,760)
Less advances to Madero to the Acquisition Date, net of Madero’s cash	<u>(4,235,682)</u>
Net amount allocated to mineral properties	104,047
Net assets acquired	\$ 1,017,000

5. DUE TO RELATED PARTIES

Amounts due to related parties include directors, officers, companies they control, and companies with common directors and/or officers. The amounts are unsecured, without interest or fixed terms of repayment (note 13).

7. REFUNDABLE ACQUISITION FEE**Mexico/Colombia Project Acquisition Letter of Intent**

Under a letter of intent dated December 6, 2004 (as amended January 31, 2005) (“LOI”) between the Company, Geosermin S.A. (“Geosermin”), a Mexican corporation, and Minera San Jorge S.A. de C.V. (“MSJ”), a Mexican corporation, MSJ, Geosermin and/or affiliated companies provided data to the Company with respect to two mineral projects, one in Colombia and one in Mexico. Under the LOI, the Company advanced MSJ US\$150,000 as an advance payment in connection with the acquisition of either the Colombian or Mexican project. The LOI provides that the advance is to be repaid by MSJ if the Company declines to proceed with the acquisition of both the Colombian and Mexican projects. The advance is evidenced by a promissory note from MSJ and is secured by the pledge of 250,000 shares of Tumi Resources Ltd. (“Tumi”), a TSX Venture Exchange (“TSXV”) listed company, registered in the name of MSJ. These shares are held by the Company.

Following due diligence, the Company determined not to proceed with the acquisition of either the Colombian or the Mexican projects. On April 1, 2005, the Company demanded the return of the USD 150,000 refundable acquisition payment but, to date, such repayment has not occurred. The Company has determined that it has the legal right to sell the Tumi shares and is proceeding accordingly. As at February 29, 2008, shares of Tumi closed at \$0.73 per share on the TSXV, representing a gross value for the pledged securities of \$182,500. The Company previously wrote down the deposit to a value of \$100,000 in 2005.

Other Properties, Argentina

Madero Uranium Project, Argentina

Pursuant to an agreement dated July 11, 2005 (“LOI”) between the Company and the individual shareholders of Madero Minerals S.A. (“Madero”), a private Argentinean corporation, the Company has the option (subject to regulatory acceptance - received October 21, 2005) to acquire all of the outstanding securities of Madero from its shareholders. In order to exercise the option, the Company is required to pay the shareholders USD 100,000 (paid) and issue the shareholders an aggregate of 600,000 common shares of the Company, as follows: 100,000 shares 10 days after regulatory acceptance (issued), 200,000 shares on or before November 8, 2006 (issued), and 300,000 shares on or before November 8, 2007 (issued) (Note 4). Pursuant to the exercise of its option, Madero became a wholly-owned subsidiary of the Company effective September 12, 2007.

At the time of the execution of the LOI, Madero held, or had applied for, 17 prospective uranium properties in Argentina. Based upon initial work completed by the Company, 16 of the properties have been dropped, and further work has focused on the two remaining projects, Alemania and Amblayo. In addition, subsequent to the execution of the LOI, Madero has continued to actively seek out and apply for/acquire additional prospective uranium properties, which would be acquired by the Company upon the exercise of the option to acquire Madero. Although Madero believes that the majority of such applications will be successful, there can be no assurance that all or any of such exploration concessions (“cateos”) will be granted. Madero may determine to abandon some of such applications in order to secure title to others of the cateos applied for. As of November 30, 2007, the Company has written down these properties by \$1,094,318.

South Galan Property, Argentina

Pursuant to a Letter of Intent for Joint Venture dated March 22, 2006 (as amended by a letter dated August 12, 2006) (the “LOI”) between the Company and two individual prospectors, based upon information provided by the prospectors, the Company applied for five cateos in Salta and Catamarca provinces, Argentina, referred to as the “South Galan Property”. Pursuant to the LOI and upon such applications having been made, the Company is required to issue an aggregate 50,000 common shares to the Prospectors, subject to TSXV acceptance (received July 23, 2007). All cateos have been granted.

Salta Province

Pursuant to an option agreement dated May 29, 2007 between the Company and an Uruguayan corporation, as accepted by the optionor on July 30, 2007, the Company has an option to acquire a 100% interest in and to one cateo in Salta Province in consideration for the issuance of an aggregate of 200,000 common shares, as to 100,000 common shares (issued) 30 days after TSXV acceptance of the agreement (September 20, 2007) and the balance of 100,000 common shares on the first anniversary of the date of such acceptance.

Jujuy Province

Pursuant to an option agreement dated May 29, 2007 between the Company and two South American individuals, as accepted by the vendors on May 30, 2007, the Company has the option to acquire a 100% interest in and to one cateo in Jujuy Province in consideration for the issuance of an aggregate of 200,000 common shares, as to 100,000 common shares (issued) 30 days after TSXV acceptance of the agreement (September 20, 2007) and the balance of 100,000 common shares on the first anniversary of the date of such acceptance.

8. MINERAL PROPERTIES (Continued)

Diamante-Los Patos Project, Argentina

The Diamante-Los Patos Property consists of 16 cateos and 13 minas (“exploitation concessions”) covering an area of approximately 156,361 hectares, which have been applied for by Madero on behalf of the Company. Of these, 8 cateos (approximately 56,816 hectares) have been granted, while the balance of the cateos and the minas have been applied for but not yet granted. The minas cover portions of the property subject to 4 of the granted cateos (which cateos will be dropped in conjunction with the grant of the minas, leaving an aggregate of 12 cateos and 13 minas). The data which led to the discovery of the Diamante-Los Patos project was supplied by two prospectors, and in consideration of being provided with such data, the Company agreed to issue to the prospectors an aggregate of 100,000 common shares (issued).

San Jorge Basin Properties, Argentina

Ramirez concession

Pursuant to an option agreement dated March 13, 2007 between the Company and two Peruvian individuals, the Company has the option to acquire a 100% interest in and to 20 cateos located in the province of Chubut, Argentina (the “Ramirez” concessions). In order to exercise the option, the Company is required to issue an aggregate 50,000 common shares as follows: 10,000 shares (issued), 21 days following TSXV acceptance (May 23, 2007) of the agreement and an additional 10,000 shares on each of the first, second, third and fourth anniversaries of the date of execution of the agreement (March 28, 2007).

Paniagua concessions

Pursuant to an option agreement dated March 13, 2007 between the Company and two Peruvian individuals, the Company has the option to acquire a 100% interest in and to 20 cateos located in the province of Chubut, Argentina (the “Paniagua” concessions). In order to exercise the option, the Company is required to issue an aggregate 50,000 common shares as follows: 10,000 shares (issued) 21 days following TSXV acceptance (May 23, 2007) of the agreement and an additional 10,000 shares on each of the first, second, third and fourth anniversaries of the date of execution of the agreement (March 28, 2007).

Drago concessions

Pursuant to an option agreement dated March 13, 2007 between the Company and a Peruvian individual, the Company has the option to acquire a 100% interest in and to 11 cateos located in the province of Chubut, Argentina (the “Drago” concessions). In order to exercise the option, the Company must issue an aggregate 50,000 common shares as follows: 10,000 shares (issued) 21 days following TSXV acceptance (May 23, 2007) of the agreement and an additional 10,000 shares on each of the first, second, third and fourth anniversaries of the date of execution of the agreement (March 28, 2007).

Castelli concessions

Pursuant to an option agreement dated May 29, 2007 between the Company and two South American individuals as accepted by the optionors on July 30, 2007, the Company has the option to acquire a 100% interest in and to three cateos in Chubut Province in consideration of the issuance of an aggregate of 160,000 shares, as to 80,000 shares (issued) 30 days after TSXV acceptance (September 20, 2007) of the agreement and the balance of 80,000 shares on the first anniversary of the date of such acceptance.

Explomin Properties, Argentina

Pursuant to an option agreement dated May 29, 2007 between the Company and the individual shareholders of Exploraciones Mineras, S.A. (“Explomin”), a private Argentinean corporation, the Company has the sole and irrevocable option (subject to regulatory acceptance - received September 21, 2007), to acquire all of the outstanding securities of Explomin from its shareholders. In order to exercise the option, the Company is required to pay the shareholders USD 50,000 (paid) and issue the shareholders an aggregate of 1,000,000 common shares, as follows: 100,000 common shares 30 days following TSXV acceptance (issued), 100,000 common shares on or before March 21, 2008 (postponed), 100,000 common shares on or before September 21, 2008, 250,000 common shares on or before March 21, 2009 and, 450,000 common shares on or before September 21, 2009.

At the time of the execution of the option, Explomin was the owner of five applications for cateos located in the province of Chubut, Argentina, aggregating 48,306 hectares and covering a number of known uranium occurrences.

Canada Properties

Mackenzie Project, British Columbia

Pursuant to an agreement dated May 2, 2005 between the Company and five individuals (the “Vendors”), the Company has the option to acquire a 100% interest in the Mackenzie Project, which is comprised of 118 mineral claims located in east-central British Columbia approximately 150 kilometres north of Prince George. In order to acquire a 100% interest, the Company is required to:

- 1) Pay the Vendors \$80,000 (paid) and issue 100,000 common shares (issued) within 10 days of TSXV acceptance of the acquisition (received June 10, 2005);
- 2) Pay the Vendors an additional \$25,000 (paid) and issue an additional 200,000 common shares on or before June 10, 2006 (issued);
- 3) Pay the Vendors an additional \$25,000 and issue an additional 250,000 common shares on or before June 10, 2007; and
- 4) Pay the Vendors an additional \$25,000 and issue an additional 250,000 common shares on or before June 10, 2008.

The Vendors retain a 2% Net Smelter Return (“NSR”) on any production. The Company may purchase 50% of the NSR, being 1%, for payment of \$1,000,000 at any time until June 10, 2026.

Based on the results of the exploration work, the Company returned the property to the vendors and wrote off the investment of \$1,811,195 as of November 30, 2007.

Courville, Quebec

Pursuant to an agreement entered into prior to November 30, 2007, but dated December 14, 2007, the Company was granted an option by GFK Resources Inc. (“GFK”) (formerly Noise Media Inc.) to acquire up to an undivided 20% interest in the Courville Property, located in the township of Courville, Quebec.

The Company may acquire an undivided 10% interest in the Courville Property (“First Option”) upon incurring \$125,000 in expenditures on the Property on or before December 30, 2007 (\$127,381 incurred) or paying to the Company an amount equal to the difference between the actual expenditures incurred and \$125,000. The Company may acquire a further undivided 10% interest in the Property (“Second Option”), for a total of a 20% interest, upon incurring an additional \$250,000 in expenditures on the Property on or before December 30, 2008. Upon exercise of the First Option or, if the Company elects to acquire a 20% interest, then upon exercise of the Second Option, GFK and the Company will be deemed to have formed a joint venture in respect of the Courville Property. The Company will acquire its interest in the Courville property subject to a 1.5% NSR in favour of the Vendor and a further 1.5% NSR in favour of a third party. The Company will be the operator of the Courville Property during the option period (note 13).

Peru Properties

Radiante I Property, Peru

Pursuant to an agreement dated April 7, 2006, the Company acquired a 100% interest in the Radiante I property, comprised of one mining concession in the Province of Carabaya, Peru, from Minera San Isidro S.A.C., a private Peruvian corporation, for 200,000 common shares (issued).

Radiante II Property, Peru

Pursuant to an agreement dated April 7, 2006, the Company acquired a 100% interest in the Radiante II property, comprised of one mining concession in the Province of Carabaya, Peru, from Minera San Isidro S.A.C., a private Peruvian corporation, for 200,000 common shares (issued).

Hilton Property, Peru

Pursuant to an agreement dated April 7, 2006, the Company acquired a 100% interest in the Hilton property, comprised of one mining concession in the Province of Carabaya, Peru, from Minera San Isidro S.A.C., a private Peruvian corporation, for 200,000 common shares (issued).

(“Koripampa”), a private Peruvian corporation, for US\$167,000 (paid).

Title to Mineral Properties

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyance history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties for which titles have been issued are in good standing.

Although the Company has taken steps to verify the title to mineral properties in which it has or has a right to acquire an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee title (whether of the Company or of any underlying vendor(s) from whom the Company may be acquiring its interest). Title to mineral properties may be subject to unregistered prior agreements or transfers, and may also be affected by undetected defects or the rights of indigenous peoples.

Private Placements

On July 12, 2006, the Company completed a brokered private placement consisting of 1,230,000 non flow-through units at a price of \$1.75 and 300,000 flow-through units at a price of \$1.95 for gross proceeds of \$2,737,500. The Agents were paid a commission consisting of \$116,375 cash, 43,000 share purchase units and an option to purchase up to 153,000 common shares at a price of \$2.00 until January 12, 2008. Each unit consisted of one common share and one-half of a transferable warrant. Each full warrant is exercisable to acquire one additional common share at a price of \$2.25 until January 12, 2008. During the year ended November 30, 2007, 139,183 options and 234,917 warrants (2006 – Nil) were exercised.

On July 13, 2006, the Company completed a non-brokered private placement consisting of 170,000 units at a price of \$1.75 per unit for gross proceeds of \$297,500. Each unit consisted of one common share and one-half of a transferable warrant. Each whole warrant is exercisable to acquire one additional common share at a price of \$2.25 until January 13, 2008. A cash finder’s fee of \$29,750 was paid in connection with this placement. During the year ended November 30, 2007 (2006 – Nil) no warrants were exercised.

On March 9, 2007, the Company completed a bought deal private placement of 3,500,000 units at \$2.00 per unit for gross proceeds of \$7,000,000. The Company also issued 207,000 commission units valued at \$414,000 and paid \$76,000 in cash commissions and other expenses totalling \$121,195, in connection with the private placement. Each unit consisted of one common share and one-half of a warrant to purchase an additional common share at a price of \$2.50 until March 9, 2009. The warrants carry an accelerated expiry feature such that if at any time between July 10, 2007 and March 9, 2009, the daily volume-weighted average trading price of the Company’s shares trade above \$4.00 for at least twenty consecutive trading days, the Company may, within 30 days, issue an expiry acceleration notice to the holders of the warrants and, if it does so, the warrants will expire 30 days from the date after the expiry acceleration notice is given (unless exercised). During the year ended November 30, 2007, 648 warrants were exercised.

In connection with the March 2007 private placement, the Company granted 280,000 underwriters’ options to the underwriters, each underwriter’s option exercisable to acquire one share at a price of \$2.00 per share until March 9, 2009. Stock-based compensation charges in respect of these grants totalled \$701,716. During the year ended November 30, 2007, 1,675 options were exercised.

11. STOCK OPTION PLAN AND STOCK-BASED COMPENSATION

The Company has adopted an incentive stock option plan (the “2004 Plan”). The essential elements of the 2004 Plan provide that the aggregate number of common shares of the Company’s capital stock issuable pursuant to options granted under the 2004 Plan may not exceed 10% of the number of issued shares of the Company at the time of the granting of the options. Options granted under the 2004 Plan will have a maximum term of five years. The exercise price of options granted under the 2004 Plan will not be less than the discounted market price of the common shares (defined as the last closing market price of the Company’s common shares immediately preceding the issuance of a news release announcing the granting of the options, less the maximum discount permitted under TSXV policies), or such other price as may be agreed to by the Company and accepted by the TSXV. Options granted under the 2004 Plan vest immediately, except for options granted to consultants conducting investor relation activities which will become vested with the right to exercise one-fourth of the option upon the conclusion of each three month period subsequent to the date of the grant of the option, unless otherwise determined by the directors at the date of grant.

The Company uses the Black-Scholes option pricing model to value stock options granted. The model requires management to make estimates, which are subjective and may not be representative of actual results. Changes in assumptions can materially affect estimates of fair values. For purposes of the calculation and disclosures, the following assumptions were used:

Options Granted	Risk Free Interest	Expected Life	Expected Volatility	Expected Dividends
October 18, 2007	4.22%	2 years	71.72%	-
August 24, 2007	4.26%	2 years	73.52%	-
April 11, 2007	4.10%	2 years	73.87%	-

August 29, 2005	3.10%	2 years	51%	-
May 5, 2005	3.03%	2 years	129%	-

The current fiscal period contains \$103,197 due to the vesting of stock options from prior periods. No new stock options were granted. In the fiscal period ended February 28, 2007, stock-based compensation expense of \$1,120,949 was calculated using the Black-Scholes option pricing model. The expenses were based on options vested in the year and the following newly issued grants:

- a) December 5, 2006: options to acquire up to 400,000 shares granted to directors and exercisable at \$2.00 per share for two years.
- b) February 28, 2007: options to acquire up to 500,000 shares granted to directors, officers and consultants and exercisable at \$3.10 per share for two years.

16. CONTINGENCY AND COMMITMENT

- a) The Company has entered into a month-to-month arrangement for the rental of office premises and the provision of administrative services totalling \$8,190 per month.
- b) All phases of the Company's operations are subject to environmental regulations. Environmental legislation, in the countries in which the Company is currently performing exploration work is evolving in a manner, which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and heightened degree of responsibilities for companies and their officers, directors and employees. Although, presently, compliance with such laws is not a significant factor in the Company's operations, there is no assurance that future changes in environmental regulations, if any, will not adversely affect the Company's operations.
